

 **CARECO** AI co-pilot for  
Care Coordinators

Early implementation findings from a co-evaluation of the CareCo AI platform integrated with ThoroughCare's care coordination software.

**50% increased  
Productivity  
and Efficiency**

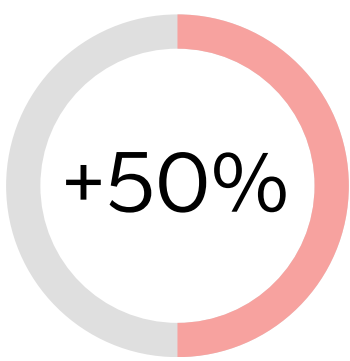

Monthly averages recorded by two care coordinators before and after using CareCo.

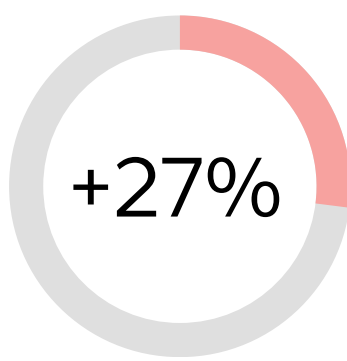

“The time a Care Coach spends with a patient can now be 100% focused on the conversation and not split with a focus on taking notes and recording/documenting during the call.”

- Candace Stewart, Team Supervisor  
24OurCare

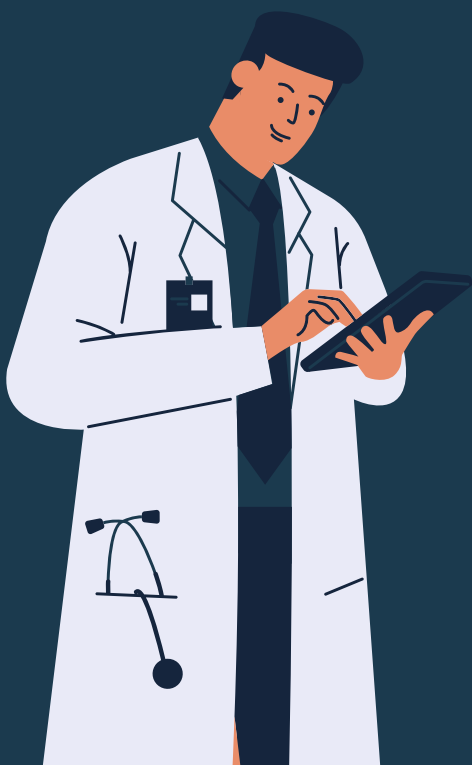

**Increased  
Task Performing  
Accuracy**

**Increased  
Customer  
Retention**

**Decreased  
Task Delays  
and Omissions**

AI-powered medical transcription and clinical decision support systems have demonstrated significant improvements in healthcare workflows and decision-making processes. Notable data points include:

- Enhanced Documentation Quality and Efficiency
- Improved Decision Support
- Increased Accuracy
- Positive Impact on Workflows
