

ThoroughCare AI

AI That Strengthens Care Management at Scale

Achieve more consistent care delivery, stronger documentation, and scalable performance across both episodic and longitudinal value-based care models.

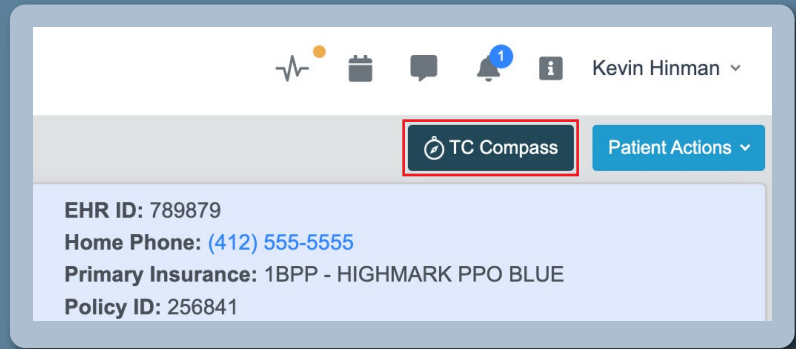

ThoroughCare embeds AI directly into care management workflows—enhancing documentation, improving execution, and surfacing patient insights at the point of decision-making. The result is more efficient, insight-driven care delivery with the structure and transparency needed to scale confidently across value-based models.

What We Offer

- Native Patient Intelligence
- AI-Enhanced Documentation
- Actionable Care Planning
- Guided Adoption and Consistency

One Click to Smarter Care

Access Compass directly from the patient's chart to view data and insights with a single click

Built to Reduce Friction Across Value-Based Care Programs

ThoroughCare AI is designed to strengthen the most fragile points in care management workflows: patient engagement, documentation, and follow-through.

By combining native AI insights, AI-enhanced interactions, and guided adoption, ThoroughCare helps organizations operate with the reliability today's care models demand, without removing the human element of care.

ThoroughCare AI Includes:

Compass

Native AI within the patient chart that streamlines workflows, consolidates data, and enables faster, more informed patient engagement

AI Transcription powered by CareCo

AI-enhanced call recording and transcription that captures conversations at the point of care and converts them into structured, actionable care plan tasks

Lyndon

AI-powered, real-time support for care teams that helps resolve complex inquiries, reduce administrative burden, and enables staff to focus on high-value care

Move directly to meaningful outreach and intervention with **Compass**

Turn every conversation into coordinated patient engagement with **CareCo**

Lyndon delivers AI-powered support to care teams, resolving complex inquiries, reducing admin work, and allowing staff to focus on high-value care.
