

Behavioral Health INTEGRATION (BHI)

Care Coordination for Value-Based Care Success

Software to effectively implement BHI, streamline mental health assessments, and maximize Medicare incentive payments.

Enhance care plan development and review with accurate clinical content

Utilize clinically validated assessments to identify behavioral health conditions, including PHQ-9 (Depression), GAD-7 (Anxiety), CAGE (Alcohol), DAST-10 (Substance Abuse), and MDQ (Mood Disorders)

Analyze patient risk factors and generate clinical recommendations

- Live dashboards to track and manage clinical and operational activities real-time
- Log BHI time live with audit trail generation for billing and claims accuracy
- Automatically assign CPT codes and conditions to claims based upon the time spent with the patient

Proactively manage patient health through automatic scoring across substance dependency, behavioral health, and more.

Patient Info	Care Management	Wellness	Transitions	Assessments/Screenings	Clinical Data	Billing	Alerts	Documents	Videos
Screening Assessments									
Date/Status	Depression (PHQ-9)	Anxiety (GAD-7)	Alcohol (CAGE)	Substance Abuse (DAST-10)	Mood Disorders (MDQ)				
08/30/2022	0 - None	16 Severe	2 Possible alcoholism	0 - None	0 - None				
N/A	0 - None	0 - None	0 - None	0 - None	0 - None				
07/29/2022	19 Moderately severe	16 Severe	3 Possible alcoholism	9 Severe	true Positive
