

# ThoroughCare ANALYTICS

## Insight Driven Care

Real-time patient care coordination data for insightful clinical analysis and intelligent decision support.

Proactively manage patient health

Analyze trends in data to improve efficiency of clinical workflows

Assess and streamline care team productivity

Run extensive reports to keep patients and care providers aligned

Identify billing gaps and maximize revenue streams

### HARNESS YOUR DATA

- Advanced reporting across robust clinical, operational, and financial data
- Aggregate data across clinical sites and practices
- Interactive dashboards with visualization tools

# Visualize. Interpret. Engage.

## Advance Patient Engagement and Health

- Monitor, assess, and support patient attainment of health-related goals
- Benchmark and track clinical quality goals

## Analyze and Optimize Operations

- Measure productivity across individuals, groups, and organization
- Identify opportunities for staff efficiency and organizational workflow enhancement

## Enhance Revenue Potential

- Meet financial performance incentives
- Increase managed care to a larger patient population

“ Having access to Analytics has allowed us to better measure, monitor, and manage all aspects of our program, and in turn, provide a higher level of service to our practices. ”

Todd Shafer  
VP of Information Strategy  
MetaPhy Health
