

Provider Hub

Less Time Navigating. More Time Delivering Care.

Provider oversight is essential to effective care management, with many practices requiring providers to review and sign off on care plans and Annual Wellness Visits (AWVs). As patient panels and programs expand, these reviews accumulate across individual charts, making it increasingly difficult to identify what needs attention and complete sign-offs efficiently.

ThoroughCare's **Provider Hub** consolidates care-plan reviews, sign-offs, and outstanding tasks into a centralized workspace. With clear readiness indicators, pending durations, and relevant patient context, providers can quickly see what needs review and efficiently complete sign-offs with fewer unnecessary steps.

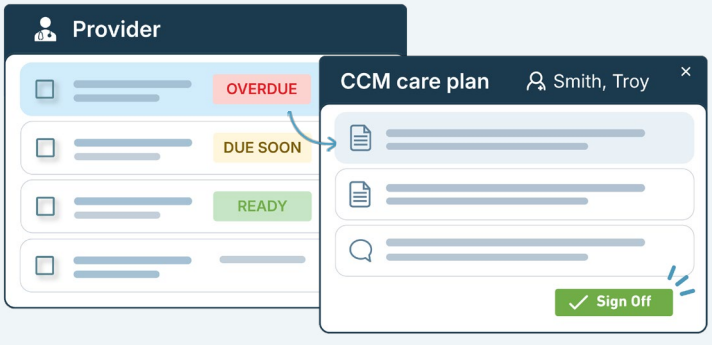

For healthcare leaders, increased visibility into pending approvals empowers teams to monitor outstanding tasks, pinpoint bottlenecks, and maintain momentum in care management operations.

At a Glance

- Access all care-plan and AWV reviews in one worklist
- Easily spot items needing attention with clear status and readiness indicators
- Review patient info and complete pending sign-offs in one workflow

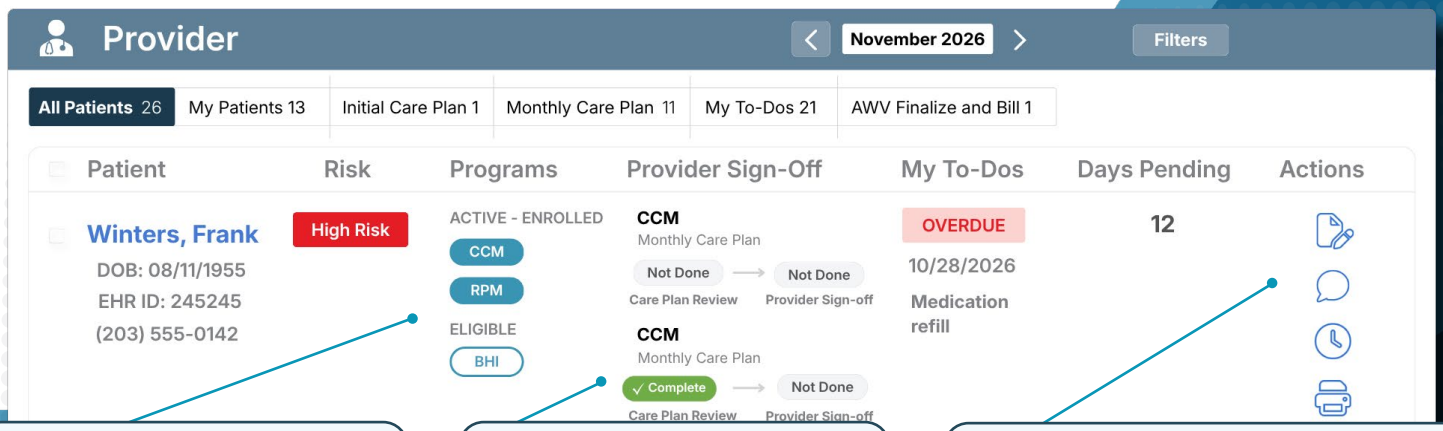

PROVIDER WORKFLOW OPTIMIZATION

Find what needs attention, review patient information, and complete sign-offs without jumping between charts.

One worklist. Efficient provider oversight.

Provide care teams with a streamlined view of care plans and AWVs requiring their review, along with the essential context and status to facilitate timely action.

Complete visibility

See enrolled programs, risk level, and care team information in one view.

Actionable sign-off status

Instantly identify items ready for review and those requiring further attention.

Quick Access to Actions

Manage patient communications, documentation, tasks, and care team updates directly from each row.

Surface Outstanding Tasks, Faster

Access care plans and AWVs that are ready for review from one centralized worklist. Preset views, filters, and readiness indicators help providers identify outstanding actions without searching through individual patient charts.

Review and Sign Without Repeated Navigation

Review relevant patient information and complete eligible care plan and AWV sign-offs in a guided sequence. Move through multiple review actions for the same patient without repeatedly returning to the worklist.

View Pending Items and Wait Times

Clear sign-off statuses and Days Pending indicators make outstanding approvals easy to identify. Providers can better prioritize reviews, and care team leaders gain visibility into tasks that could delay documentation, follow-up, or billing workflows.

Keep Care Teams and Providers Aligned

Completed reviews and sign-offs are reflected in the underlying patient record, helping care managers and providers work from consistent information and coordinate next steps.

Keep Reviews Moving. Keep Care on Track.

Enable providers to efficiently manage recurring sign-offs while giving care leaders clear oversight of outstanding tasks.
