

Remote Monitoring Hub

Act on the Readings That Matter. Bill for the Care You Deliver.

Remote monitoring produces a steady flow of patient data, making it challenging for care teams to identify at-risk patients, coordinate follow-up, and document interventions efficiently.

The **Remote Monitoring Hub**, part of ThoroughCare's Command Center, integrates Remote Patient Monitoring (RPM) and Remote Therapeutic Monitoring (RTM) with broader care management, population health, and revenue workflows. Designed for large-scale programs, this centralized workspace helps teams focus on critical readings, streamline tasks, and monitor progress.

AI-supported workflows bring together severity indicators, vital trends, and context-aware priorities, while clinicians retain oversight of outreach and documentation. Together, these capabilities reduce administrative burden and keep care teams focused on delivering meaningful patient care.

At a Glance

- Prioritized RPM and RTM readings with clear severity indicators
- Centralized patient management for efficient review, assignment, and documentation
- Real-time monitoring insights into patient activity and monthly program progress

One Workspace. Greater Visibility Into Care.

View patients' conditions, vital trends, and monthly monitoring progress at a glance. By bringing essential patient information together in one view, the Remote Monitoring Hub helps care managers spend less time searching for updates and more time evaluating patient needs and coordinating next steps.

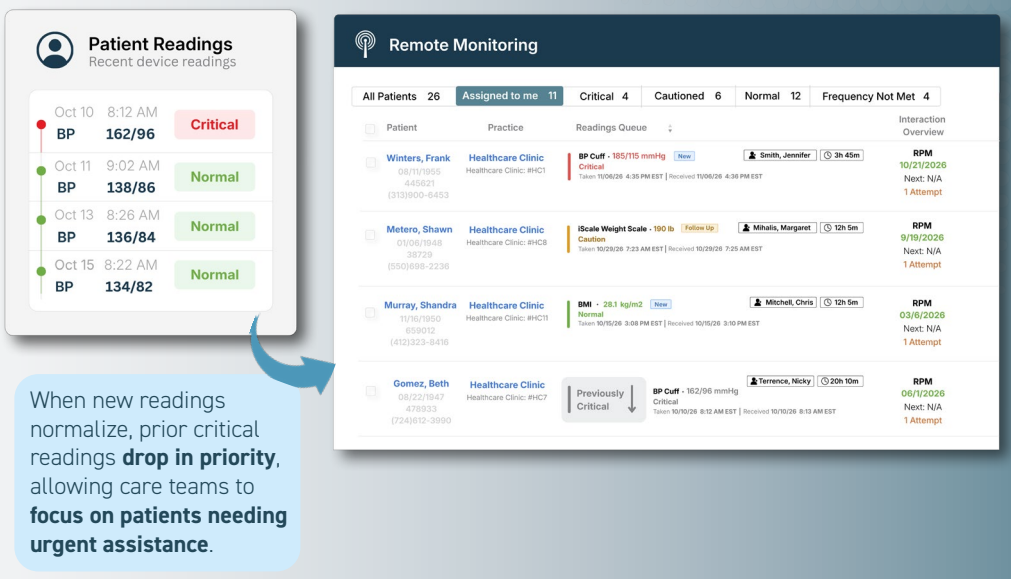

BUILT FOR WHAT MATTERS NOW

Context-aware prioritization

If normal readings follow a critical one, that critical reading drops in priority, letting your team focus on more urgent patients.

- **Reduce alert fatigue** by adjusting reading priority when more recent data indicates improvement
- **Prioritize patients needing attention** by bringing readings requiring timely attention to the forefront

When new readings normalize, prior critical readings **drop in priority**, allowing care teams to **focus on patients needing urgent assistance**.

Designed to Keep Care Teams One Step Ahead

Connect With Patients Without Leaving Your Worklist

Move from reviewing readings to taking action with quick-access communication tools. Reach out directly from the Remote Monitoring Hub to address concerning readings, follow up on patient needs, and keep care moving.

Coordinate Care and Streamline Documentation

Access patient care plans, log time, create follow-up tasks, and assign readings to care team members, all from one connected workflow. Keep responsibilities clear and important patient interactions documented.

Strengthen Billing Compliance With Revenue Integrity

ThoroughCare's Revenue Integrity capabilities help identify potential compliance gaps before claims are submitted, including missing RPM initiating visit and consent documentation, to reduce billing risk and support audit-ready claims.

Simplify Remote Monitoring. Strengthen Coordinated Care.

Discover how ThoroughCare helps care teams prioritize RPM and RTM readings, streamline patient follow-up, and support more efficient monitoring programs.
